CASCADE...PIPE REPAIR MADE QUICK & EASY

Wrap clamp around pipe. Bring together using locking washer plate.

Lock in place. Squeeze the lugs together and spin the nuts down.

Tighten the nuts evenly working from the outside to the inside with a wrench. Detailed instructions are attached to each clamp.

You have just made a permanent repair.

Take a good look at the clamp before you bury it. It's the last time you'll ever see it!

Produced for Logan Diving, Inc. for installation on 48" HDPE with spiraling crack. HDPE line is outfall from a Jacksonville, FL. treatment plant in the Ortega River.

CASCADE designs and produces repair clamps for all kinds of special needs, including very large diameter, varying O.D. sections, high temperatures, concrete joints, and cracked iron pipe Bell joints.

CALL CASCADE WITH YOUR SPECIAL NEEDS

MATERIAL SPECIFICATIONS

CR1

WASHER

PLATE: T304 SST
Locks into position for easy tightening of nuts.

FINGER LUGS:

T304 SST MIG welded to receiver bar. Leading edge is rounded to permit locking washer plate to slide into position easily.

SHELL: T304 SST

STUDS: 18-8 SST, 5/8"-11 NC rolled thread. Studs are MIG welded to bolt bar.

NUTS: 18-8 SST, 5/8"-11 heavy hex, Xylan coated

STUD & RECEIVER BARS: T304 SST TIG welded to shell.

GASKET: SBR formulated for water service with antioxidant/antiozonant agents to increase shelf life.

ARMOR: T304 SST

OUTLET: 18-8 SST TIG welded to shell.

CDR1

LUGS: Ductile Iron ASTM A536 Grade 65-45-12. Designed for ease of installation.

LUG SHELL & JOINT:

Joint connection designed for maximum torquing.

SHELL: T304 SST

BOLTS: High strength low alloy steel 5/8" NC. T304 SST available.

NUTS: High strength low alloy steel. T304 SST available.

GASKET: SBR formulated for water service with antioxidant/antiozonant agents to increase shelf life. (Also available in EPDM.)

ARMOR: Stainless Steel T304.

OUTLET: Stainless steel 18-8 TIG welded to shell.

Clamps are also available with T316 Stainless Steel. CDR fasteners are also available in T304 or T316. All weldments are fully passivated in accordance with ASTM A380.

* Repair Clamps do not provide restraint against lateral movement of pipe.

To Order: Determine desired range and length, then select corresponding catalog number.

Note: Other ranges and lengths not listed are available upon request. For higher pressures, clamp length should be equal to or in excess of pipe O.D.

Conductivity Strips available upon request.

FEATURES & BENEFITS

- Easier to attach Repair Clamps to pipe (especially smaller Pipe ODs)
- Safely attach Repair Clamps to Pipe — Clamp is held in place while the nuts are tightened
- Easier to slide Repair Clamp into place over leak
- Adjustability for all:
 - CR Series Repair Clamps & (CR1, CR2, CR2-SR, CR3)
 - CRT Series Tapped Repair Clamps (CRT1, CRT2, CRT2-SR, CRT3)
- Compact tool size
- Materials resistant to wear
- Saves time during installation
- More consistent installations
- Able to handle harsh environments
- Designed for Left-handed or Right-handed use
- Easy to use
- Lifetime warranty
- Patent 7,364,202 B1 & 7,314,236 B2

Catalog Number: CR1-TOOL

STYLE CR2

DOUBLE SECTION - WIDE RANGE

To Order: Determine desired range and length, then select corresponding catalog number.

Note: Other ranges and lengths not listed are available upon request. For higher pressures, clamp length should be equal to or in excess of pipe O.D.

Conductivity Strips available upon request.

STYLE CRT & CDRT

TAPPED REPAIR CLAMPS

All CR1, CR2, CR2-SR, CR3, and CDR1, CDR2, and CDR3 repair clamps are available with tapped outlets. Outlets are T304 stainless steel TIG welded to the clamp and fully passivated, in accordance with ASTM A380.

To Order:

Select size, length and style of clamp. Select type and size of thread for outlet. Add list price for outlet to list price for clamp. Insert the letter "T" into the catalog number and indicate tap size and type style at the end. Consult catalog or factory for specification or application information.

Example:

A single band clamp for 6" D.I.P. - 12" long with a 3/4" CC Outlet = CRT1-724-12-3/4CC

Tap Size Available	Type of Threads Available
3/4"	IP or CC
1"	IP or CC
1 1/4"	IP or CC
1 1/2"	IP or CC
2"	IP or CC

Note: Other ranges and widths not listed may be available upon request. For higher pressures, clamp width should be equal or exceed pipe O.D. Conductivity strips are available.

A Cascade Invention Patent No. 5,288,108.

Quick and complete repair of cracked bell without cutting pipe and shutting down line. Pipes can be repaired under pressure, eliminating costly chlorination and notification of boil water notices.

FEATURES

- Fully encloses any type of Bell Joint or coupling
- All Stainless Steel, the ultimate corrosion protection
- Custom designed to fit any size diameter

MATERIAL SPECIFICATIONS

Shell / Lugs / Retaining Clamps: T304 SST

Fasteners: T304 SST 5/8-11 NC, Rolled Thread; Xylan Coated Heavy Hex Nut

Washers/Washer Plate: T304 SST

Gaskets: Virgin SBR

NOTE: Due to the variety of Bells in service, please obtain precise dimensions. It is recommended that you consult Cascade Waterworks once you have obtained all pertinent details regarding the bell crack.

TO ORDER: Determine actual pipe O.D., Bell Type, Bell O.D., length of crack in bell, etc. Consult with factory for proper selection.

Cascade's Bell Joint Repair Sleeve (CRBJ) is designed to seal cracked bells when no other means of repair is feasible, and a temporary shut-down is not possible (such as with hospital service). This labor intensive sleeve is not meant as a means of sealing a failed gasket, where other repair options are available. Be prepared for extended lead times on this highly specialized product.

For easy repair of leaking solvent welded PVC pipe joints.

To Order: Determine desired range and length, then select corresponding catalog number.

Consult Factory on all pricing requests

Nominal Pipe Size (Inches)	Clamp O.D. Range (Inches)	Catalog Number	Approximate Shipping Weight (lbs.) per length			
			6"	8"	12"	16"

NOTE: Standard CCLC designed for Class 160 and SDR 26 PVC solvent weld collars.

WARRANTY

Cascade Waterworks Mfg. Co. warrants its product(s) for one year from the date of shipment to be free of defects in material or workmanship. Cascade will repair or replace this product if found to be defective within the warranty period, provided that the buyer submits his claim in writing and delivers the original claimed defective product in its entirety, freight prepaid to Cascade Waterworks Mfg. Co., 1213 Badger Street, Yorkville, IL, 60560 for inspection within 30 days. Any written notice and/or product shall be sent directly to Cascade unless otherwise instructed. Sending these to a manufacturer's representative or any other agent prior to Cascade's review will void all warranties. Cascade will not be liable nor responsible for any

loss, damage or injury to any persons or property directly or indirectly arising from the use or inability to use this product. The user shall determine the suitability of the product for its intended use prior to any application and said user assumes all risks in connection with the use of this product. No claims for labor or damage will be allowed. The foregoing warranties and remedies are exclusive and in lieu of all others, whether written, oral, or implied. Buyer must advise Cascade within 30 days of discovery of the alleged defect or the claim will be barred. Upon the products' purchase from Cascade Waterworks Mfg. Co., or any of its Agents, the purchaser agrees to all of the above terms of warranty.
