

"THE STANDARD OF EXCELLENCE IN THE INDUSTRY"

CASING SPACERS (Plastic) – STYLE CCSPL - Silver

The casing spacers shall be non-metallic (High Density Polyethylene - HDPE) and molded in segments for field assembly with hand tools. The casing spacer shall have integrally molded, solid-core runners extending beyond the bell. The Phoenix Silver Casing Spacers shall be placed within two feet of both ends of the casing pipe with all remaining spacers assembled along the length of the carrier pipe at an equal distance apart not exceeding six feet (6') in length. All Phoenix Silver Casing Spacers segments are supplied with molded pliable Thermoplastic Rubber (TPR) non-slip buttons having a high coefficient of friction that is designed to grip all types of pipe (especially good for PVC). Segments are interconnected using Urethane bolts and Nylon nuts for a completely non-metallic assembly. The Phoenix Silver Casing Spacers will fit 1-1/2" thru 3" nominal pipe sizes. Cascade's Phoenix Silver Casing Spacers are proudly molded in the United States of America. The casing spacers shall be Series CCSPL, as manufactured by Cascade Waterworks Mfg. Co., Yorkville, Illinois, or approved equal.
