

## CASING END SEALS STYLE CCES

### INSTALLATION INSTRUCTIONS

- 1) Verify Pipe O.D. of the casing pipe and the Pipe OD of the carrier pipe to insure that correct end seals are being used.
- 2) Thoroughly clean the last 6" of each end of the casing pipe and the carrier pipe where the end seal will be located.
- 3) Pull the end seal (large opening first) over the carrier pipe towards the casing pipe.
- 4) Continue to pull the end seal onto the casing pipe until approximately 2" to 3" of the end seal covers the casing pipe. Place the strap around the end seal and fully tighten the strap.
- 5) Slide the carrier pipe side of the end seal close to the end of the casing pipe and then fully tighten the strap.
- 6) Place the strap on the carrier pipe side of the end seal and tighten the strap.
- 7) Repeat steps 1 - 6 for the other end of the casing pipe.

**NOTE: END SEAL IS NOT WATER TIGHT. IT IS A BARRIER FOR DIRT AND DEBRIS.**
